Perfect For 'First Fix' Shower Installations

FITTING INSTRUCTIONS

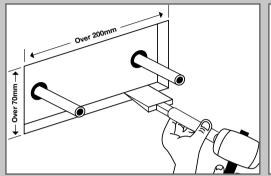

First Fix for Supply Pipes at 150mm Centres

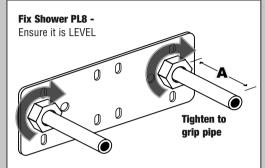

Block or brick wall -Chase or drill through

Stud wall -Fix to noggin or stud

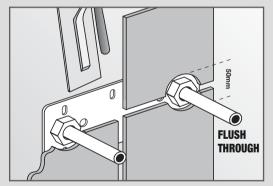

Rendered Wall -Chase out recess at least 200mm x 70mm x 15mm deep

Use correct fixing screws (and wall plugs) for the wall structure (not supplied). A must be finished wall thickness + 60mm minimum

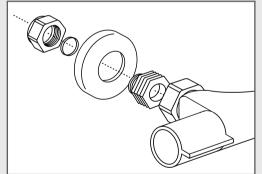

Decorate

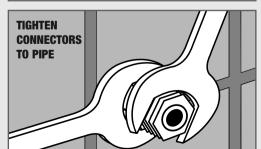

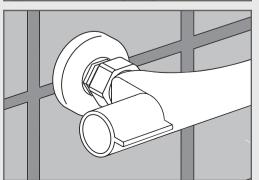

Apply plaster and/or decorative finishes such as ceramic tiles.

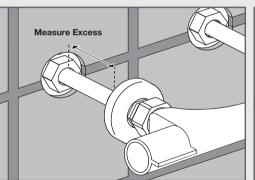

Before fitting the shower mixer valve ensure pipe work is **flushed through** thoroughly.

Fit the Shower Mixer

Offer up the shower mixer and determine the finished pipe length to ensure the cover flanges will meet the wall.

CUT AWAY

EXCESS PIPE

Using a pipe slice cut away excess pipe and fit the shower mixer with the fittings supplied.

Always use 2 spanners to tighten the compression fittings on to the pipe.
